OPTIONAL EQUIPMENT

EcoSpa Insulation System

EcoSpa is one of the best thermal insulation systems currently available on the market. This comprehensive system minimizes heat loss through convection and conduction, and utilizes the heat generated by the heaters and pumps located within the spa. The walls feature a 30 mm thick layer of special polyurethane foam insulation. A strong ABS plastic substructure beneath the cladding ensures complete waterproofing. Finally, an isothermal membrane between 100 and 130 mm thick provides additional insulation.

All these features minimize heat loss and maximize the recovery of heat generated by the spa's components, thus reducing energy consumption by up to 67%. With ECOSpa Insulation, maintaining water at a temperature of 38°C from a room temperature of 20°C requires 6.48 kW/hour, while without this system, 19.52 kW/hour of energy is needed.

Nordic Insulation System

The NORDIC INSULATION SYSTEM is designed for cold environments and can improve the energy efficiency of your spa.

The Scandinavian insulation system incorporates a 10 mm thick insulation material consisting of five layers. This insulation layer is positioned along the edges and curves of the span to create an insulating air chamber on the inside. The five layers are constructed as follows:

Aluminum.

RC9 bubble wrap + low-density polyethylene (double layer).

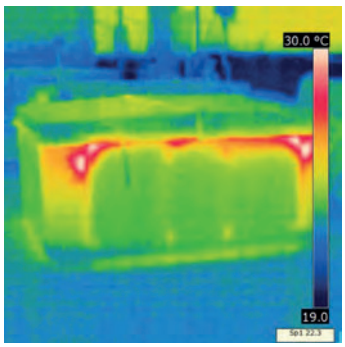
FONPEX cross-linked polyethylene foam (20 kg/m^3).

RC9 bubble wrap + low-density polyethylene (double layer).

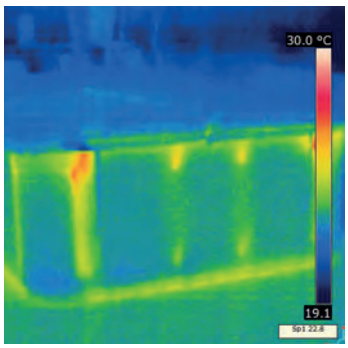
Aluminum.

This system is more advanced than the EcoSpa insulation system because it minimizes areas where heat leakage may occur and optimizes spa energy performance under extreme temperature conditions.

The difference between EcoSpa and Nordic insulation systems as seen in the thermal camera:



EcoSpa Insulation System



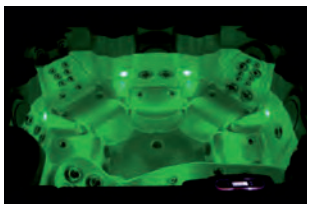
Nordic Insulation System

Touchscreen Wi-Fi control panel

The Balboa Wi-Fi control panel allows you to access your spa remotely, whether from your home or from afar, using your smart device (Android™ or iPhone®). All you need is a 3G, 4G, or Wi-Fi connection to access and control your spa via your mobile phone or tablet.

Using the Wi-Fi control panel, you can ensure the spa is always ready for use. Instead of going outside and fiddling with buttons on the control panel, this app will allow you to change your spa settings from your mobile phone or tablet.

The app features a complete control interface allowing you to adjust water temperature,



OPTIONAL EQUIPMENT

LumiPlus + Bluetooth Audio System,

Available only in fully coated portable spas.

Natural treatments are one of the essential health resources provided by a spa. Chromotherapy and music therapy are excellent complements to any spa.

Chromotherapy is a natural technique based on the use of colors to help your mind and body find their natural physical and emotional balance. With the LumiPlus option selected, 5 LED spotlights are installed in your spa, allowing you to enjoy a stunning lighting system. Thanks to the 5 LED spotlights, you can always choose colors that match your mood.

The Bluetooth Audio System allows playback from any mobile phone, MP4 player, or audio equipment via a simple Bluetooth connection, without the need for any cables, within a range of up to 7 meters. Now you can transform your spa into a relaxation, health, and beauty center.

The Advance product line includes a 4.1 Bluetooth Audio System consisting of four external speakers, a built-in subwoofer, and a Bluetooth receiver.

The Essential product range includes a 2.1 Bluetooth Audio System consisting of two external speakers, a built-in subwoofer, and a Bluetooth receiver.

LumiPlus + Bluetooth Audio System System Option

Blue Connect Plus

Feel free to remove your SPA key with peace of mind.

Blue Connect analyzes water quality and recommends the necessary chemicals for maintaining your Jacuzzi.

Advanced technology connected to your smartphone.

Blue Connect Plus is a smart jacuzzi water analyzer that monitors your water quality and informs you about the number of products available for your jacuzzi. See it all from your smartphone.

Sit back and relax. Thanks to Blue Connect, the Jacuzzi is at your fingertips.

Monitor your Jacuzzi from anywhere with the connected Hot Tub water analyzer and the free Blue Connect app.

Ozone disinfection system

Ozone is a special type of "active oxygen" found in nature. Ozone is a powerful oxidizing agent and, unlike traditional chemical products, it leaves no toxic residue behind and simply reverts back to oxygen when it has finished its work.

Furthermore, tests have proven that it effectively kills bacteria and mold.

AstralPool includes a high-performance, integrated ozone system as standard in all its portable spas.

It produces spas equipped with generators. The ozone device has numerous benefits: with its high redox potential.

Safer, cleaner, and purer water usage without chloramines, trihalomethanes, and other chlorine products. Algae control and water disinfection are achieved using lower amounts of chemicals.

A spa with ozone-treated water is one of the most enjoyable relaxation and hydrotherapy experiences.

Ultraviolet disinfection system

Spas equipped with ultraviolet (UV) systems are disinfected using UV technology. Thanks to the UV lamp, all bacteria in the water are eliminated. The advantages of the ultraviolet system can be summarized as follows:

- It keeps the water clean and clear.
- It is an effective and safe way to disinfect water.
- UV-C light breaks down bound chlorine.
- It protects the water from germs.
- It keeps mold, bacteria, and algae growth under control.
- It can reduce the amount of chlorine and other chemical products used by up to 80%.
- It prevents the odor of chlorine and irritation to the skin and eyes (bloody eyes).
- It is more environmentally friendly than traditional methods.

Using this system, all bacteria, mold, and algae will be automatically removed from your spa, keeping it germ-free without any maintenance.

Aroma is available only in spas with blowers.

Aromatherapy offers the therapeutic properties of pure aromas for a natural treatment, making a significant contribution to helping restore your natural balance and harmony.

No one is indifferent to scents. They evoke emotions, memories, and dirt. Enhance the relaxing effect of your spa by adding a fragrance!

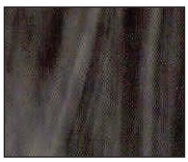
No. 46 MAV1 MARBLE

No. 59 STERLING



No. 64 Pearl Shadow

No. 65 ALBA

No. 27 SILVER_

OPTIONAL EQUIPMENT

Chromotherapy LED Lighting,

Specifically for commercial spas.

Mini LED lamps are the best option for lighting commercial spas. Thanks to high-intensity LEDs, the lighting is equivalent to that achieved with traditional lamps.

LumiPlus Mini 2.0 projectors feature a wide range of color combinations and sequences with higher 1k intensity and improved energy efficiency; this results in up to 80% savings in electricity consumption compared to traditional projectors, as well as a maintenance-free lifespan of 100,000 hours.

Chromotherapy LED lamp option

MASSAGE NOZZLES

This set, consisting of three nozzles, mixes air and water, stimulating blood circulation in areas such as the calves, hips, and thighs. It is mounted vertically on the pool wall at 30, 60, and 90 cm above the bottom. This set comes with a polished stainless steel round grab bar that can be mounted outside the pool or on the pool wall. This grab bar has two functions: to provide a grip for pool swimmers and to massage the user by allowing air to pass through the holes placed along its length.

SAUNAS

+ Source of health and well-being.
+ Besides being for relaxation, saunas have also been used for medicinal purposes for thousands of years.
+ Our ancestors felt the healing benefits of saunas, and modern science confirms this.
+ Sauna is an excellent way to improve blood and motor systems, reduce muscle pain, and increase joint mobility. It's also a good partner for our skin, making it radiant and beautiful.
+ Saunas help us stay healthy by increasing vitality and energy.
+ More saunas, more health and well-being.

VENTURA

Features

- Easy installation
- Versatile material selection (Ventura panels are always inside the cabinet)
- Modern look with a fully glass front and advanced Ventura panels.
- Measurements and layout can be easily changed.
- Improved PIR insulation
- Available as a hybrid sauna.

Product details1

"High performance for energy efficiency (P1R insulation)" "Single-pane 8mm tempered glass wall"

"High-quality wood veneer-covered Ventura seating groups."

"High-quality ash wood veneer on top and inside panels. Wall thickness approx. 100mm width."

"Sauna heater is sold separately.

DESTINATION LOUNGER

The Destination Lounger allows you to relax and enjoy your pool. Elegant design and robust construction combine to give pool owners the opportunity to easily enhance their sunbathing area in terms of both view and comfort. Made using an advanced RTM manufacturing process, Destination Loungers are lightweight yet strong. The innovative design allows pool owners to easily fill it with water, but more importantly, they can easily remove the lounger from the sun rack when not in use by moving it to remove the water.

- Perfect for commercial use.
- For use around a pool with a water depth of up to 30 cm.
- High-quality RTM composite material
- UV protection against fading.
- Compatible with all pool types, including vinyl.
- Special colors and visual textures
- It is easy to drain and remove when not in use.

4 color options are available:
