AUTOMATIC POOL CLEANING TECHNOLOGIES

To clean a pool in the best way possible,**suitable cleaning robot**The choice depends on multiple parameters:

Pool details and materials, cleaning standard 1, areas to be cleaned, etc.

With different characteristics,**Zodiac® high-tech cleaning robots1**It meets every budget and cleaning time requirement.

4 types of cleaning technology It is used in: cordless cleaning, electric cleaning, hydraulic cleaning and pressure cleaning.

ZODIAC® CLEANING ROBOTS: HIGH PERFORMANCE, INDEPENDENT SYSTEM

Separate from the filtration system.and easily connected to the main power supply,**Plug & Play independent**It is a piece of equipment that works.

Without requiring any action and**programmable**With its structure (cleaning time, area to be cleaned, etc.), it reaches every corner of the pool, climbs the walls, cleans the waterline, and collects waste in its own filter bag.

There are different types available for all kinds of pools.

> ZODIAC®WIRELESS ROBOTS SERIES 1 PERFORMANCE

Cordless vacuum cleaners are easy to use daily and take up little space. The long-lasting lithium-ion battery guarantees a full cleaning cycle without compromising performance.

The wireless series utilizes the best Zodiac technology to ensure maintained cleaning performance. You can control the battery power and start the cleaning cycle via the user interface on the robot.

> ZODIAC® H1DROL1K CLEANING ROBOTS: A SIMPLE AND AFFORDABLE SOLUTION

These robots are for more efficient and uniquely high-pressure cleaning.**It uses the swimming pool's filtration pump as power source 1.**

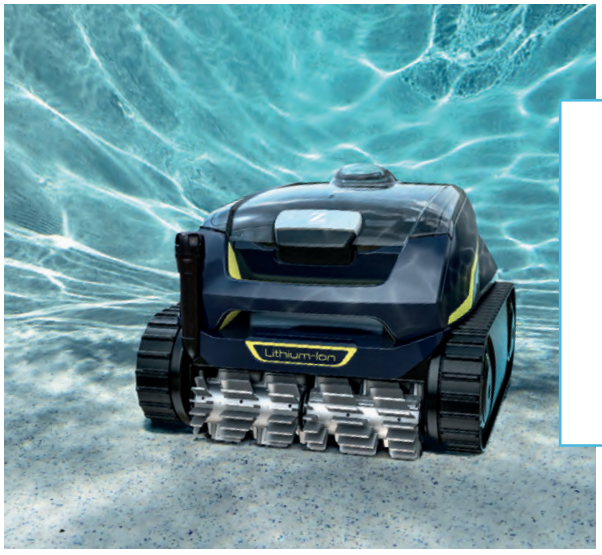
Pressure cleaning robots are connected to the pool feed inlet, not the vacuum line. In this way, the pool skimmers remain active and maintain their full surface filtration capacity.

Pressure cleaning robots operate with a booster pump, and the pump has a filter bag where the vacuumed waste is stored to prevent the pre-filter basket from becoming blocked.

WIRELESS POOL ROBOTS

PERFORMANCE IS NOW WIRELESS!

Our cordless pool robots offer true freedom – no cables, no clutter – just effortless performance. Designed with the user in mind, these models eliminate cable constraints, making setup, storage, and use easier than ever. Behind this simplicity lies serious engineering: extensive research and testing ensure they meet the high performance and reliability standards expected of Zodiac®, offering the added advantage of complete freedom of movement.



> IN WIRELESS ROBOTS FREEDOM

FREEDOM TO MOVE

"Freedom of Movement" is the pictogram you'll find when you see a Zodiac cordless robot. Its long-lasting lithium-ion battery guarantees thorough cleaning without compromising performance.

To deliver on this promise of freedom, we've developed a suite of smart features designed to elevate every step of your wireless cleaning journey, so users can enjoy it more and have less to manage.

TAP & LIFT | Easy removal from water

No more struggling to get the robot out of the water: TAP & LIFT™ Technology makes removing the robot from the pool effortless. Once cleaning is complete, pressing on the lid brings the robot to life, allowing it to climb the wall in front of it; it remains at water level, ready to be lifted. A smarter and easier way to remove a cordless robot from the pool.

LIFI REMOTE CONTROL | STAY IN CONTROL EVEN UNDERWATER

Traditional wireless robots lose connection underwater, limiting user control during cleaning. Unlike radio wave signals, a specialized remote control powered by Li technology transmits light pulses directly to the robot's antenna, ensuring stable communication below the surface. This technology allows for direct interaction with the robot.
- You can start or stop the cleaning process, direct it to a desired point, or recall it to the surface when needed.

Tap & Lift™ TECHNOLOGY

Easy water retrieval for wireless robots.

If the cordless robot isn't removed from the water immediately after completing its cleaning cycle, it will enter sleep mode and rest at the bottom of the pool. To wake it up, the user simply needs to touch the top of the lid. The robot will then climb to the nearest wall, allowing the user to easily retrieve it from the waterline.

STEP 1:

Using pool handle1 and hook1, tap the top of cover 1.

STEP 2:

The robot wakes up and moves towards the nearest wall, climbing all the way to the waterline.

STEP 3:

Grasp the robot's handle and pull it out of the water.

MULTI-DAY CYCLE

A week of peace.

Unleash the potential of your cordless cleaner with the Multi-Daily cycle, an additional cleaning mode available via the iAqualink® app. This mode allows you to break down cleaning cycles into smaller batches, ensuring your pool is maintained throughout the week.

HOW DOES IT WORK?

Choose between 3 or 2 cleaning cycles.
Select the cleaning mode type: floor, walls and waterline mode with full pool lining1 or floor cleaning only.
Enter the required interval between each cycle: 24 hours, 48 hours, or 72 hours. At the end of the last cycle, there will be a notification indicating that it's time to pick up the robot.

Wireless cleaners equipped with multi-day cycle:
RF 5400 iQ and RF 5600 iQ

FREERIDER®

Complete freedom and performance.

SICLONIC

The powerful cyclone inside the filter keeps debris suspended, preventing clogging and ensuring long-lasting performance.

ZODIAC SIGNATURE TECHNOLOGY

Our commitment to innovation ensures that every robot cleaner is designed for maximum efficiency and ease of use. Through continuous R&D, we develop the latest technologies that simplify operation and maintenance while improving cleaning performance. These advancements differentiate our models,

It offers a superior pool cleaning experience without any compromises.

S-PATTERN | FULL POOL COVERAGE

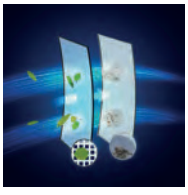
Smart back-and-forth navigation is ideal for rectangular or square pools with flat bottoms and non-slip surfaces. This ensures full coverage by reaching every corner and maximizes cleaning efficiency without unnecessary obstruction.

S-PATTERN

SICLONIC SUCTION POWERFUL CLEANING

The filter holds the contaminants in suspension, limiting clogging and ensuring longer-lasting suction.

CYCLONIC SUCTION



DOUBLE-SPEED FILTRATION | LONG-LIFE EM1_

Offering the most durable and effective system on the market for removing even the finest particles, this 2-combination filter prevents premature clogging.

DUAL FILTRATION

SENSOR NAV S1STEM1 +TM | SMART NAVIGATION FOR SPECIAL CLEANING

The system analyzes the pool's size and shape to optimize cleaning patterns and timing, focusing on high-waste areas and flat surfaces such as pool bottoms to achieve superior results.

Sensor Nav System

LIFT SYSTEM +TM | EASIER LIFTING THAN WATER

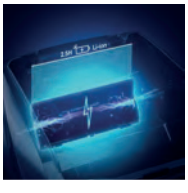
The robot climbs the selected pool wall and stops at the water level. Then, it sprays water from a powerful jet unit, which makes it up to 20% lighter when lifted, allowing for easy removal with minimal effort.

LIFT SYSTEM

SWIVEL | CABLE TANGLING PREVENTION TECHNOLOGY1

The automatic swivel system prevents the cable from tangling while the robot is operating in the pool. This optimizes the robot's efficiency and makes cable storage easier.

SWIVEL



WIRELESS TECHNOLOGY1 | FREEDOM OF MOVEMENT

Powered by a high-efficiency lithium-ion battery, this device delivers uninterrupted, powerful cleaning performance, ensuring a seamless and convenient pool maintenance experience.

* In pools with very steep slopes, it may be necessary to change the cleaning schedule as well (via the app).
* * For optimum cleaning performance in slippery pools, a special kit (supplied with the robot) may need to be fitted.

WIRELESS POOL ROBOTS

OP 32- PIXEL™

NEW 2026

Complete freedom and simplicity.

+ Wireless freedom

+ Efficient floor and wall cleaning

+ Effortless use: compact, lightweight and easily removed from water.

Manufacturer's original warranty: 2 years.

LITHIUM-ION

PRODUCT CODE AND UNIT PRICE

Product Code	WR000625
Unit Price EURO	890.00

ACCESSORIES INCLUDED IN THE PACKAGE

_charging cable1	Universal Hook	150µfilter

WHICH POOLS ARE SUITABLE FOR CHINA?

Pool type	Private pools with rigid walls, both underground and above ground.
Maximum pool dimensions1	8 x 4 m
Pool_attached	Rectangular, oval, freeform
Pool floor attached	Flat, gentle slope, varied slope, steep slope15°
Pool Type	Liner, reinforced concrete, Polyester, PVC, Ceramic

EXPLANATION

Mobile Application Control	No
Cleaning areas1	Floor / Wall
cleaning cycles	1 cycle
Cleaning cycle time	Floor / Walls: 2h
Battery life	120 min
_charge type	**1ç Mekan _arj1**
Charging time	< 4h
Remove from the pool	Hook
Timer	No
Cleaning	Pre-program
Check system	Tracked
Traction system engine number 1s1	1 engine
Towing system transfer	**gear**Transfer
Pressure sensor	No
Cleaning brushes	Yes
Brush type	Front Brush
Lift system	No
_transparent filter window	Yes
_transparent filter window	No
Remote control	No
Security	Pool surroundings, underwater work safety, identification, electronic motor protection
Filter system	Rigid filter housing
Filter access	Easy access from the top.
Water Temperature Measurement	No

TECHNICAL SPECIFICATIONS

Number of motors	2
Battery type	Lithium-Ion
Renewable Battery	Yes, Pro too.
Battery Capacity	5 x 100 mAh
Filtering area1	425 cm^2
Filtering level	150µ
Filter capacity	2 L
suction	17 cm
Product dimensions1	36 x 29 x 29 cm
Package dimensions 1	32 x 39 x 32 cm
Robot weight	5.8 kg
Package weight	7.7 kg

ZODIAC®

WIRELESS POOL ROBOTS

Freedom Lite

NEW 2026

Smart cleaning. Effortless.

+ Cleans intelligently, thoroughly. The filters clearly show: Smart Cleaning methods / Dual filtration / Front and rear brushes

+ Easy control for true peace of mind: 5 modes/app including daily scheduling.

+ Agile in design and adapted to every pool: Dual traction motor and intelligent sensors for smooth navigation.

Manufacturer's original warranty: 3 years

FLUIDRA pool

Unit Price EURO	1,900.00

ACCESSORIES INCLUDED IN THE PACKAGE

Control Panel	DualIFine Particle Filter 60µ /150µ	Free App

OPTIONAL ACCESSORIES (NOT INCLUDED IN THE PACKAGE)

100µSingle-Stage Filter	200µSingle-Stage Filter	Robot Enclosure Cover	Carry
R0897500	R0897700	R0568100	R0639500

WHICH POOLS ARE SUITABLE FOR CHINA?

Pool type	Private pools with rigid walls, both underground and above ground.
Maximum pool dimensions1	12 x 6 m
Pool floor attached	Rectangular, oval, freeform
Pool surface	Ceramic, Liner, Polyester, PVC, Reinforced Concrete
Pool surface	Liner,Painted concrete,Polyester hull,Reinforced PVC,Tiles

EXPLANATION	
Mobile Application Control	Yes
App Application	iAquaLink
Cleaning areas1	Floor / walls / waterline
cleaning cycles	2 cycles
Cleaning cycle time	Ground floor only: 1h30 Floor / walls / waterline: 2h30
Timer	No
Power supply 1	Pre-transformer, 230 V mains connected, autonomous.
Orientation	Pre-programmed
Check system	Tracked
Traction system engine number 1s1	2 motors
Towing system transfer	Language transfer
Sensor	Yes
Cleaning brushes	Yes
Brush type	Spiral brushes at the front and rear.
Lift system	No
_transparent filter window	Yes
Filter Full Warning	No
Remote control	No
Security	Pool surroundings, underwater work safety, identification, electronic motor protection
Filter system	Rigid filter housing
Filter access	Easy access from the top.
Pool water temperature monitoring	No
Units/pallet	20

TECHNICAL SPECIFICATIONS	
Power supply 1 feed	220-240 VAC / 50-60 Hz
Number of motors	3
Playing power	150 W
Cable length	18 m
Filtering area1	1066 cm^2
Filtering level	150/60µ
Filter capacity	4 L
suction	23 cm
Product dimensions1	43 x 40 x 30 cm
Package dimensions 1	56 x 56 x 37 cm
Package weight	8 kg
Packaged Weight	15 kg

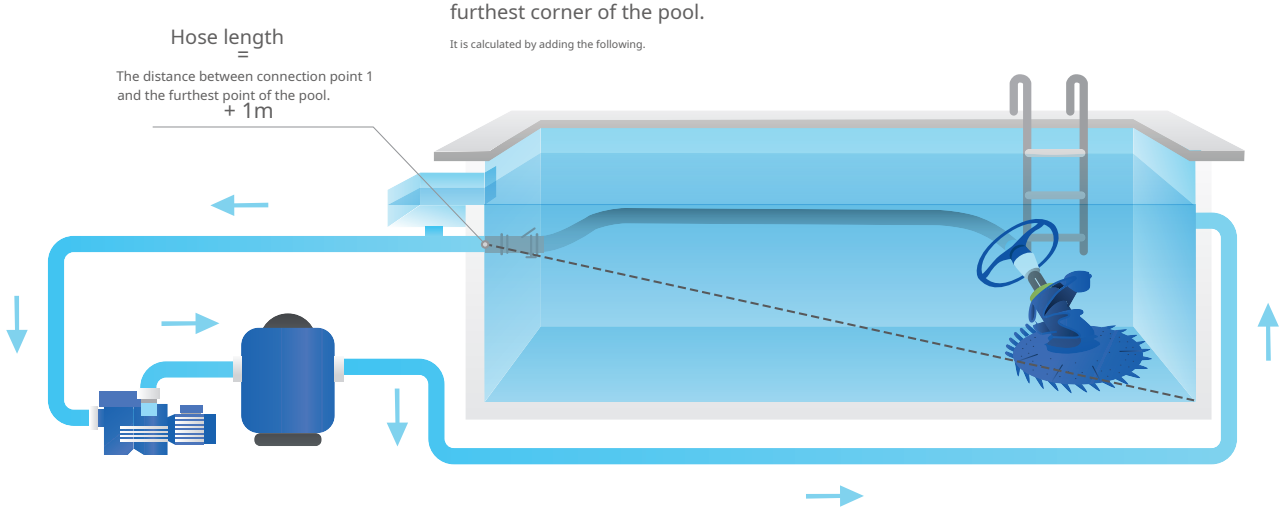
STANDARD INSTALLATION

"Emi_ cleaner direct vacuum
It connects to point 1 or skimmer. No electrical connection is required.

"The ideal hose length for the pool is u,
The distance the skimmer can cover in the pool is defined as a 1-meter section from the starting point (skimmer) to the furthest corner of the pool.

It is calculated by adding the following.

"An ak1_ test for optimum setup.
Perform the operation and adjust the flow rate using the control valve.



HYDRAULIC CLEANING EQUIPMENT

MX6TM- MX™SERIES

Powerful Cleaning

+ Pre-programmed X-drive navigation system: methodical cleaning in all areas.

+ Turbo vacuum power: a powerful turbine and dual brush propeller system.

+ Brush tracked conveyor system: for continuity and mobility.

+ The flow control valve automatically controls the flow rate passing through it, ensuring optimal performance and long-lasting cleanliness.

MX10TM

ACTIVE BRUSHING FOR DEEP CLEANING

Cyclonic Brushing

With its cyclonic brushing technology, it can clean dirt from the pool without sucking it up. The robot's active brushes mean it can clean all kinds of dirt, including stubborn algae that sticks to the pool floor and edges.

PRE PROGRAMMED

The MX10, with its pre-programmed X-Drive navigation system, methodically moves across all areas to be cleaned, providing unparalleled coverage regardless of the shape and size of your pool.

TURBO

The MX10 turbo intake system utilizes a powerful turbine and a double-sided suction impeller that directs all dirt and debris to the cleaner's nozzle. It guarantees ultra-efficient cleaning even at low flow rates.

DİRT SUCTION

Convertible dirt suction inlet for large or small dirt particles.

HYDRAULIC CLEANING EQUIPMENT

MX10™-MX™RANGE

Active brushing for deep cleaning.

+ Pre-programmed X-Drive navigation system: methodical cleaning of all areas.

+ Turbo EMI: Methodical cleaning of all areas.

+ Ergonomic handle: for easier water drainage.

Manufacturer's original warranty: 2 years

Unit Price EURO	**4,500**

ACCESSORIES INCLUDED IN THE PACKAGE

Carry	Power supply 1	Dual-stage filter 150µ and60with µ filters	Contact + ZZ Brushes	Free mobile APPLICATION	Kinetic Bluetooth remote control

WHICH POOLS ARE SUITABLE FOR CHINA?

Pool features	Underground and above-ground rigid-walled pools, up to 25 meters in length.
Pool_attached	Rectangular, oval, freeform
Background_attached	Flat, soft, various, vertical
Pool surface	Ceramic, Liner, Polyester, PVC, Reinforced Concrete

EXPLANATION

Cleaning areas1	Floor / Walls / Waterline
Cleaning cycle count and duration	Multiple 0h to 30h Cycles: - H1zl1: Ground only 1h15 - Smart: Floor/Walls/Waterline (calculated time) - Ultra: Floor / Walls / Waterline (2h45)
Timer	7-day / up to 3-hour work delay
Power supply 1	Before the transformer, connected to the 230 V grid, autonomous.
Orientation	Pre-programmed1
Check system	Pallet - 2 motors
gear	Reinforced_gear_transmission
Pressure sensor	Yes
Brushes	Yes (Contact + ZZ Brushes)
Lift System	Yes
_transparent filter window	No
Filter Full Warning	Yes
Remote control	Remote control (via mobile app)
Pool water temperature monitoring	Yes (in the mobile app)
Security	Pool surroundings, water d1_1 work safety i, tan1, electronic motor protection1
Filter system, access	Rigid filter housing with easy top access.
Quantity / Pallet	12

TECHNICAL SPECIFICATIONS

Number of motors	3
Power supply 1 feed	200-240 VAC; 50/60 Hz
Power supply 1	30 VDC
Playing power	150 W
Cable length	30m
Robot dimensions1 (L x W x H)	47 x 51 x 29 cm
Package dimensions1 (L x W x H)	56 x 56 x 46 cm
Robot weight	13 kg
Package weight	24 kg
Filtering area 1 and level	1827 cm2 / 150 and 60µ
Filter capacity	5 L
suction	24.5 cm

OPTIONAL ACCESSORIES (NOT INCLUDED IN THE PACKAGE)

100 Fine Particle Filter Housingµ	Large Particle Filter Housing 200µ
R0863600	R0863700

2 YEAR GUARANT1

INFRARED SENSOR

TURBO MODE

START/DELAY

ARCO

DESIGNED SPECIFICALLY FOR HIGH USE IN PUBLIC POOLS.

+ Infrared sensors for detecting walls and obstacles.

+ gyroscope and compass-assisted ak1ll1 navigation system

+ Yo un for use with a 1r service equipment and towing system

+ Ultra-powerful vacuum

+ Remote control for manual operation.

+ Designed for professional use in public swimming pools at hotels, resorts and sports centers.

PRODUCT CODE & UNIT PRICE	
Product Code	**WR000396**
Unit Price EURO	**7,100 ¬**

ACCESSORIES INCLUDED IN THE PACKAGE				
Carry	Power supply 1	Double bag filter	Remote control	Free Bluetooth® application1

WHICH POOLS ARE SUITABLE FOR CHINA?	
Pool features	Underground and above-ground rigid-walled pools, up to 30 meters in length.
Pool_attached	Rectangular, oval, freeform
Background_attached	Flat, soft, various, vertical
Pool surface	Ceramic, Liner, Polyester, PVC, Reinforced Concrete

EXPLANATION	
Cleaning areas1	Floor / Walls
Cleaning cycle count and duration	Multiple Loops: - Ground Only - Floor/walls/waterline - Delayed start in 2 cleaning cycles (3h)
Start/Delay	Delay playback for up to 3 hours.
Power supply 1	Before the transformer, connected to the 230 V grid, autonomous.
Orientation	Pre-programmed1
Check system	Pallet - 2 motors
gear	Reinforced components with a recording system transfer
Infrared sensor	Yes
Brushes	PVA
Filter Full Warning	Yes
Remote control	Yes (Bluetooth®)
Filter system, access	Bottom-access double bag filter
Quantity / Pallet	9

TECHNICAL SPECIFICATIONS	
Number of motors	3
Power supply 1 feed	110-240 VAC; 50 / 60 Hz
Power supply 1	24 VDC
Playing power	150 W
Cable length	30m
Robot dimensions1 (L x W x H)	43 x 43 x 54 cm
Package dimensions1 (L x W x H)	80 x 40 x 60 cm
Robot weight	9 kg
Package weight	22 kg
Filtering area 1 and level	3.1 kg
Maximum depth of field	5 m
suction	40 cm

WIRED POOL ROBOTS FOR PUBLIC SWIMMING POOLS
