547 WATER POLO CASTLE 1

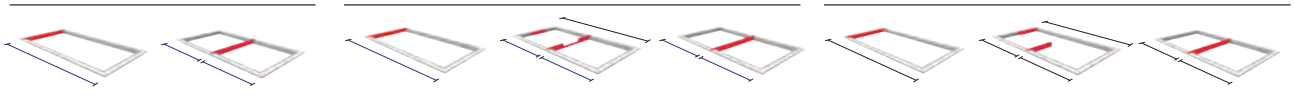
Developed by Fluidra, Bulkhead, a movable bridge, enhances the possibilities of a pool by dividing it into different areas and providing varying sizes, depths, and uses. This increases the profitability of the available space and saves on construction costs associated with building different aquatic facilities.

MOVABLE BULKHEAD

SR Smith

NEW 2023

Bulkhead is a vertical underwater bridge that can move longitudinally along the pool floor to create a physical barrier, dividing the pool into areas for different uses, thus making the best use of the space in the pool.



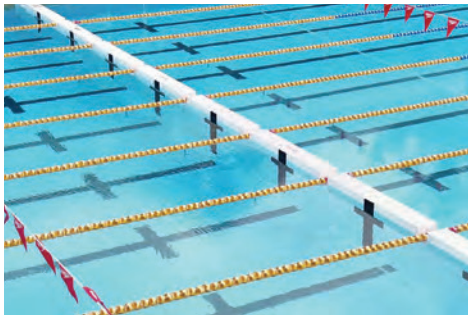
Benefits:

Easily integrated solution,
compliant with FINA standards,
fast assembly.
1_Value added for
businesses. Easy to use.
Dayan1kl1
Low maintenance requirements

MOVABLE WALL

SR Smith

The movable wall is installed at a fixed point on the pool floor where the pool will be divided in two. When not in use, the wall is completely flat in a recess in the pool floor. In a newly constructed swimming pool, the wall is integrated into a structural recess so that it is invisible when not in use.

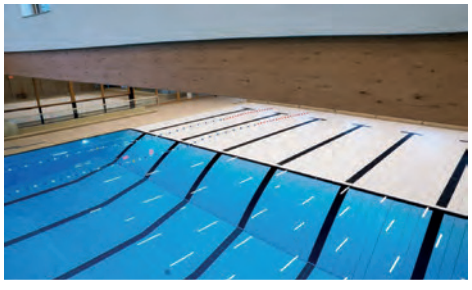


Benefits:

H1zl1 setup
1_Value added for
businesses. Easy to use.
Dayan1kl1
Low maintenance requirements

MOVABLE FLOOR

The Movable Pool Floor makes it possible to use a single swimming pool to accommodate several activities requiring different water depths simultaneously. The system is based on a submerged mobile platform that changes the height of the pool shell, allowing for the creation of areas with varying depths as needed. Additionally, the movable pool floor can be used to partially or completely enclose a pool, resulting in greater energy savings and safety.



Benefits:

Easily integrated solution H1zl1
assembly

Trustworthy

SPARGER- Safety system for diving pools1

When jumping from a diving board, the undisturbed surface creates a highly resistant surface, and this, combined with a poor landing, can cause serious injury upon impact.

AstralPool has added Sparger technology to its pools as a new safety system for diving pools. Air is released from the pool bottom under high pressure, creating a large number of bubbles when it mixes with the water to form a cushion for divers. This reduces the risk of injury and makes diving safer for both beginners and professional divers.

VELOCITY ADVANTAGE Jumping podium

The Velocity Advantage diving platform features reinforced berglas steps with starting position footrests on an HDPE composite base. It is compatible with our Bulkheads movable pool systems.

- Marine-grade HDPE composite flooring is easily mounted to pool decks or bulkheads with minimal drilling.
- With a height of 41 cm, it is very suitable for curtains and balustrades that are 20 cm to 42 cm above the water.
- The 71cm x 81cm step surface is available in TrueTread® or sand-backed finish.
- The footrest's starting block, adjustable to 5 positions, easily folds under the footrest.
- Three integrated supine handles – two in the center position and one on each side.
- Colorado & Daktronics timing system is compatible.
- The non-slip steps feature custom colors and logos.
- Complies with FINA, NCAA, NFSHSA*, USMS and USAS semi-final pool rules and regulations.

TrueTread color options:

BACKSTROKE SWIMMING START SYSTEM 1

Designed to help make backstroke starts faster and reduce the chance of slipping, the Backstroke Start System offers the option of easily adding this feature to any pool platform or diving platform configuration.

- Raised, diamond-patterned non-slip backing.
- The height of the protruding section can be easily adjusted with one hand, both inside and outside the pool.
- The end of the reel is marked with millimeter increments (-40, -20, 0, 20, 40).
- Durable HDPE frame to protect against harsh elements indoors and outdoors.
- Three unique mounting options for securing the device to most platform and podium configurations.
- Clear markings on the reel to indicate the height of the protrusion above the water level for compatibility.
- Complies with FINA 2.10 standard.

3 mounting options:

ANCHOR MOUNTING KIT

Anchoring the plastic ba_l1 to the ground with stainless steel butterfly screws.

BRACKET MOUNTING KIT

10-foot long polyester strap and stainless steel cam buckle with vinyl-coated 1/4" thick stainless steel bracket.

SENSUS RELAXATION PROGRAM
Relax Program 1 offers a comprehensive relaxation experience for both body and mind. It provides gentle, balanced water pressure and consistent temperatures to maintain balance. Chromotherapy uses soothing colors such as blue and indigo to enhance mental relaxation. Gentle piano music, soft rain sounds, and fresh aromas further stimulate the senses, creating a calm and peaceful atmosphere. This program offers a sanctuary for regaining balance and well-being.

SENSUS ENERGY1 PROGRAM
The "Energy" program is designed to revitalize and awaken muscles and skin using dynamic jets and varying temperatures. Ideal for the morning or after a spa day, this program reactivates the brain and stimulates the senses. Chromotherapy combines warm and cool colors for a dynamic visual effect. The program includes tribal sounds and a sensory rain dance for an engaging auditory experience, while citrus aromas such as lemon and orange enhance the feeling of vitality.

BALANCE PROGRAM SENSUS
The "Balance" program helps users regain their physical and mental balance through gentle and relaxing stimulation. It includes targeted water jet sequences that focus on areas such as the neck, shoulders, and back, reducing tension. A unique, metronome-like rhythm guides users to a relaxed state of concentration, balances their perception of time, and promotes harmonious mental stimulation.

SENSUS SPORTS PROGRAM
The "Sport" program 1 focuses on muscle recovery and relaxation after intense physical activity. It incorporates gradually changing water temperatures to stimulate circulation and aid muscle recovery. Sequential lateral jets massage various areas of the body to increase flexibility, reduce stiffness, and promote relaxation. Energizing sounds and aromas are also included in the program.
It revitalizes the body and mind, providing a feeling of vitality and renewal.

"Water boiling point 1: 1/2" (inches)

"Operating pressure: 1.5 / 5 bar.

"Recommended pressure: 3 bar.

"Complete set including mounting system.

"The default sequence includes: Relaxation Program: Balanced water pressure and constant flow for physical well-being. It offers a holistic relaxation experience by combining different temperatures. By blending soothing colors with chromotherapy, gentle piano music, soft rain sounds, and fresh aromas, it creates a calming atmosphere and ultimately serves as a sanctuary for restoring balance and achieving mental relaxation.

"1ste e ba l1 options (must be defined when placing the order, otherwise it is not possible to add them later) will not happen):

- Sound.
- Water Aromatherapy.
- Air Aromatherapy.

AQUAMOTUS by aquaform

AQUAMOTUS, manufactured by Aquaform, is an evolved version of the Vichy shower. Made of mirror-polished stainless steel, Aquamotus is a professional horizontal shower that mimics 16 different types of rain massage.

Hydraulic features:
"Pressure 2/5 bar.
"The recommended pressure is 3 bar.
"For pressures higher than 5 bar, we recommend installing a pressure reducer. "So uk su s1cakl1 "Hot water temperature: 1 100/150C
1 55O/ 65OC
"Minimum water flow rate 30 l/m.
Notes:

"Draining groundwater is essential for allowing water to flow freely.
"If the water hardness is above 15/18 degrees Fahrenheit, a water softener should be installed.
Recommended. Electrical properties:

"Electrical supply 100-240V 3 50/60Hz.
"12V transmission control panel.
"Maximum absorption 100W.

"We recommend installing a separate RCCB (Residual Current Idle Circuit Breaker).
"4 1_1kl1 RGB system.

Elective courses:

"AF-FL047 Benchtop mounting kit.
"IMPORTANT 1: The height of the room must be specified when placing the order.
