A professional robot that climbs walls

The SPOT has sensor technology available to help it navigate your pool optimally.

Equipped with a radio control, it responds to the finger and the eye.

With its automotive-style notched tracks and its management system, the SPOT is capable of climbing slopes, climbing walls and removing drains with complete peace of mind.

With its Multiflux axial turbo pump and its 2 different filter finenesses, nothing escapes it, from small dust to large stones.

Comes with a professional trolley that will allow you to store the robot, its cable and its power supply easily.
